Admissions Cut Prefrosh Weekend By a Day, IHC Provide Alternative Activities

By Deboki Chakravarti

For prefrosh who are sorting through their college options, Prefrosh Weekend and the pseudo-vision of Caltech life that it offers plays a role in determining if Caltech is the right place to matriculate to. This year, several changes to Prefrosh Weekend mean that prefrosh will only have two nights worth of Caltech life instead of the usual three. Traditionally, prefrosh arrives on Thursday and—after having spent Thursday, Friday and Saturday sitting in on classes, attending various panels, meeting their fellow prefrosh and talking to Caltech students, checks out on Sunday. This year, prefrosh will have to check out on Saturday morning; eliminating the Saturday night stay from the weekend is no longer responsible for them. In order to allow prefrosh a chance to experience more of Caltech than two full days would allow, Student Affairs is sponsoring a day of activities on Saturday that will include a barbeque, events thrown by the house and a concert featuring Grand Buffet, the band that opened for the Third Eye Blind concert. However, this third night will not be advertised by Admissions outside of a link to the website for the Saturday events on the Prefrosh Weekend website.

Talk of dropping the third night had circulated before the official announcement was made. IHC chair Tim Black, Admissions told the students working with Admissions on Prefrosh Weekend that the reason for cutting a day was that “they were struggling with budget,” a theme of many of the changes that have taken place around campus this past year.

Part of the reason that the budget is tight is because Admissions is planning to arrange a Prefrosh Friday the week after Prefrosh Weekend takes place in order to accommodate students who are not able to make it due to conflicts with other activities.

The changes that have taken place around campus this past year have already made arrangements with a student official program. However, students can stay unofficially on Saturday night if they have already made arrangements with a student official program.

Admissions runs Prefrosh Weekend; when students check out on Saturday morning, Admissions is no longer responsible for them.

Dean Hall Steps Down

By Yang Hu

John F. Hall, current dean of students, officially announced his decision to step down as dean this summer. During his term as dean, Hall made contributions to Caltech students both on and off campus. Hall’s accomplishments include initiatives such as the new freshman advising system and improved reference materials for all advisors; student-taught courses; and allowing students who still have a few units unfinished to walk in commencement. With the help of donors, Hall also helped to establish the Houser Fund, which supports scholarly activities and a Student Emergency Fund, a travel fund open to non-student sponsors of student travel.

Hall has been in Caltech for close to 30 years. Hall is a professor of civil engineering. He went to graduate school at University of Illinois, Champaign-Urbana followed by U.C. Berkeley. Prior to becoming Dean of Students, Hall explains that he had a satisfying career here in teaching and research with the civil and environmental engineering group. Some of the professional highlights were directing the national reconnaissance effort for the effects of the 1995 Northridge earthquake (a 2-year effort), serving on the seismic advisory boards for Caltrans and the dam safety group in the California Department of Water Resources, and consulting on seismic safety evaluations for many large dams in the western U.S.

Hall became dean of students in 2005. He was asked to chair the search committee to replace the previous dean, Jean Paul Revel. Hall adds, “Unbeknownst to me, the committee put my name on the list. The reality is that after 25 years as a post-doc and professor (this was 2005), I was ready to try something different, and going from a professor to a dean of students certainly qualified in this respect.”

When asked to describe his work, Hall responds, “The Dean’s office is a hectic place and sometimes it is hard to get to a finish point at the end of the day. Although some of the work can seem repetitive, such as considering whether to recommend extensions for students on their assignments and deciding on overload petitions, every situation is unique. Some of the most important work involves Board of Control decisions and situations of mental health, and there can be quite interesting. Being a Dean involves complications, whereas the primary role is to support students and help them reach their potential, there is also the disciplinary role when students behave inappropriately, and going back and forth between these is not easy,” said Hall.

Despite these heavy commitments, Hall rates his experience positively: “It has been really rewarding, both personally and professionally, and I will miss all of the interactions. Working with

Caltech, Harvey Mudd Kick Off Math Competition for High Schools

By Monorina Mukhopadhyay

“The mission of the California Institute of Technology is to expand human knowledge and benefit society through research integrated with education.” This mission statement reinforces the idea that one of the integral aims of any institute of higher learning is information dissemination, not only to the enrolled students, but also to the general community at large. All too often, in the quest for learning—complete homework on time—we, the students, forget that we too, need to help fulfill this aim.

On Saturday, February 20th, the Caltech Harvey Mudd Math Competition, organized for high school students in southern California by the Math Clubs of Caltech, Pasadena and Harvey Mudd College, Claremont, took a step forward in encouraging science and mathematics among high school students through its initiative. The event, held throughout the Caltech campus, involved the participation of 153 high school students in 27 teams from the Los Angeles and San Diego area, under the direction of Yukov Berchenko-Kogan, a Caltech undergraduate junior. Students from Caltech and Harvey Mudd had the help of the organizer of another math contest at the California State University at Long Beach. Awards included, in addition to medals and trophies, 45 Mathemat-

The Coffeehouse is up and running again, but not without many changes to its student employee atmosphere. Due to conflicts with the new supervising of Caltech Dining, about seven Coffeehouse student employees, mostly consisted of Darbs, have resigned in the last few weeks, leaving the night café short staffed. The resigned students have been part of the Coffeehouse student worker staff prior to this term, with some who have worked there for up to four years. Amongst the students, the predominant reason for leaving the Coffeehouse is that “the fun student-friendly atmosphere” that the workers value has diminished.

“Working at the coffeehouse has never been about the money,” said Max Jones, ex-Coffeehouse student manager. “The Darbs were willing to run it because we enjoyed working with each other, having the freedom to run the coffeehouse as we saw fit (playing music we enjoyed or putting interesting movies on), and because we were able to work on homework.”

Many complaints are also personally directed at the new Coffeehouse supervisor John-Michael Sanchez, who is also the assistant basketball coach.

“He was too confrontational,” said Sylvia Puglisa, Junior Dabney and Ruddock member who is still working at the Coffeehouse, addressing the worker supervisor interactions. According to Puglisa, many complaints from the workers are that he is unreasonable, impolite, and overly controlling.

“He does not work well with the students, does not do the work of a normal coffeehouse employee, and destroys the atmosphere which I used to enjoy about coffeehouse,” said Jones.

Workers felt that there were certain policy changes that seem to have no mo-
Get your decibel meters ready, Interhouse DJs

By Sarah Marzen

I wasn’t happy when Avery’s Interhouse was shut down half an hour early because (from what I heard) someone on Cordova complained about the noise. It’s not just Avery—several Interhouse parties have been forced to shut down early or turn down the music this year. This must seem like a very petty thing to be concerned about. Amidst budget cuts, why would I write about parties being shut down early?

Interhouse parties are not like parties at other colleges. Students spend sweaty hour after sweaty hour building dance floors, painting murals, choosing music, sometimes setting up lights to accompany the sound or flooding the courtyard. They also take care of the refreshments, which is what most other college parties seem to survive on. Caltech Interhouse parties require a lot of money and, more to the point, a lot of labor. I appreciate Interhouse parties because so much work is involved in putting them together. I also like Interhouse parties because sometimes, I like taking a break from my work.

When you’ve worked for so long on a party, it hurts to see it shut down early. Even if you yourself haven’t worked for more than one or two hours (a.k.a. me), it still hurts to see your own Interhouse shut down early. In just two phone calls from a neighbor two blocks away, there goes half an hour of the five-hour party that your friends have lost sleep and taken a week’s worth of extensions for.

Admittedly, I know almost nothing about the rules and regulations concerning the noise level at parties. But I hope that the current system—which, I hear, is two noise complaints and the party’s done—will be improved, because right now, some neighbor could call complaining about Interhouse party noise regardless of what they are actually hearing. Maybe DJ’s need a decibel meter. Worst comes to worst, maybe the talented engineers here can figure out how to contain the sound within the campus.

And if some students do make a nice soundproofing cage, maybe they can use it to stifle the loud music coming from the Ahs.

Apologies if some of the allegations in this opinion article are incorrect.

letters to the editor

Andrew Lange’s Contributions Overlooked

I was saddened to hear of Professor Andrew Lange’s passing, recently. I was also disappointed to see that his obituary in the Tech omitted his work with students of Caltech, and undergraduates in particular. More than 10 years on, I recall Prof. Lange’s interest and involvement with the student body, through mentoring, student government and the House system. I’m sure that he would have wanted this mentioned, even in your abbreviated listing of his contributions to the Caltech community. One online collection of folks remembering Prof. Lange through testimonials and photos is located here: http://www.facebook.com/group.php?gid=297676004852 or by searching Facebook for “Andrew Lange”.

Prefrosh Weekend

By Joshua Hardenbrook

Remember the best decision you ever made: “I’ll Go to Caltech! Now that an experience I’d never trade.”

You had the grades, the ethic, the sacrifice

The drive, desire, and admission price

“I just can’t wait!” That’s what you said,

To pay it forward, to the next generation

But mostly it was just one big celebration*

And with hope, and dreams wells in your eyes

He fed you a series of unflinching lies

Beer rooms, dances parties, and In-N-Out Burger

What about that all girls school with whom we were going to merge?

Rebellion, tie-dye shirts, and chocolate strawberries

The 5 star food is imported in from buenos aires

You ate it all up, they made you their fool

You didn’t notice them laugh, when you said Caltech was cool

But now you know why, you’ve lived through their pain

So cheers prefrosh, to four years of sexual frustration
The California Tech

MAR 1, 2010

IHC Weekly Meeting – February 23, 2010
Ruddick
Present: Tim Black (Chair), Chris Whelan (Blacker), Andrew Price (Dabney), Daniel Kolomeshko (Ruddock), Will Steinhardt (Ricketts), Alex Lapides (Fleming), Lucas Hartough (Lloyd), DK Lim (Avory)
Absent: Paul Fliman (Pap)
Guests: Adam Khan, Aart Minisandram
Will Steinhardt is the new Ricketts House president.
Committee Sign-ups
- Sign-ups for IHC Secretary are now on the Olive Walk, and will come down Sunday at 10 pm. The presidents are most free to do interviews on Monday, so we will probably have them then. Presidents should think about questions they want to ask candidates.
- Sign-ups for BoD Secretary are up until Friday
- Andre: BoC rep-at-large sign-ups will soon. Dan will send an email about off-campus BoC reps. Rep-at-large is appointed: off-campus reps are elected.

Prefrosh Weekend
- Admissions used to give houses $300 for a reception before the Friday house dinner. Since there’s no Friday house dinner, they’re not offering us this funding this year. Will: No funding means no fun.
- House presidents can get the list of emails of prefrosh going to Prefrosh Weekend as soon as the prefrosh gives Admissions permission to give them out. That happens when the prefrosh turn in their forms for finding hosts, which happens about April 9, about week before Prefrosh Weekend.
- Friday night of Prefrosh Weekend there used to be dinner in the houses. This year, they’ll have the In-N-Out truck for dinner, then prefrosh and students will go back to their houses for elaborate “dinner-style” elaborate dessert. Update 2/24: Prefrosh parents will be invited to dessert at Stock House during that time.
- After prefrosh check out from Prefrosh Weekend Saturday morning, they’ll be invited to stay for the day for concert with Grand Buffet, club events, and house events. House events will last two hours each, with about two house events going on at a time, except during the concert. This day might be called “Student Life Saturday,” unless someone has a better idea.

Other Stuff
- There have been some changes in the CDC. ASCIT and ARC are looking into why they happened and what they can do to help.
- John Hall is stepping down as Dean after commencement, and someone else will become Dean. Tim will look into how the IHC can be involved with this process.
- DK: Some of the Rudderhood seniors came to Avory to do a fake stick and I’m cool with it, but he emailed me at 1am, can they email sooner? I know that’s when the best takes come up? Koloudhub: I will tell them. They didn’t actually vandalize Avery guys. They printed out pictures of broken glass and taped them to windows.

MINUTES

ASCIT Board of Directors Meeting – Minutes: February 25, 2010

Officers Present: Adam Khan, Karthik Sarma, Tim Black, Brian Madlinski, Chris Hallacy, Addie Rice, Laura Conway
Officers Absent: Merid Marnoffi
Guests: Christina Wong, Jane Zhang, Fred Zhao, Shyam Srinivasan, Will Tracy
Funding Requests:
- Love Sucks: Out of Context and Fluid Dynamics a cappella are hosting their annual Love Sucks concert on March 6 and are requesting $250. For the past few years, ASCIT has approved around this amount for this concert. VOTE: Approved (5-1)
- Lloyd/Avery Capture the Flag: Fred requests funding for refreshments after a Lloyd-Avery CTF game this weekend. This will come out of the multihouse funding budget.

Presidents’ Report:
- Career Development Center: The Career Development Center is looking to hire a new assistant director to focus on helping students get into industry. They would like a couple of students to be on the selection committee. Karthik will send out a list-up email announcing this opportunity.
- Muslim Students Association: The short-term issue involving the prayer room has been taken care of; we are still looking for a permanent SAC room for interfaith prayer and meditation.

Officer Reports:
- V.P. of Academic Affairs (ARC Chair): There is a Student-Faculty lunch on Tuesday. The last new ARC rep will be elected this weekend. There was a conflict between Phi Kappa Psi and Chem 3a, which has been resolved. There was a myth circulating during parents’ weekend about freshmen having difficulty getting SURFs due to budget issues, but this is not true. Karthik is meeting soon with people from Stanford Center for Teaching and Learning. There is a blood drive on Tuesday and Wednesday. Karthik will include this in his list-up email.
- V.P. of Nonacademic Affairs (IHC Chair): The IHC has been working on Prefrosh Weekend. The plan is for Prefrosh Weekend to be on Saturday morning. Student Affairs, clubs, and the houses will sponsor activities things all day Saturday. Prefrosh can stay unofficially Saturday night. The In-Out truck is available Saturday night. There will be a dessert night in each of the houses. The IHC is also sending out Prefrosh Friday, a one-day program. Sign-ups for IHC Secretary are up until Sunday night at 10 PM.
- Treasurer: Ruddock, Avery, and Dabney have requested Interhouse funding. Totem and OoC has requested their money. Hallacy has met with several administrators about managing the budget, and Adam and Hallacy are meeting with Anthony and Maral this afternoon to discuss how the budget works.
- Social Director: Addie looking into having an ASCIT-sponsored event on the Saturday of Prefrosh Weekend.

Operations Director: Brian talked to Tom Mannion about Big Ts and Honor Keys. The Honor Keys are given to elected official or the captain of a sports team. Craig Montuori ordered four years’ worth of keys but only one year has been distributed. Will thought possibly only one year of keys was ordered. Brian has been thinking about possible rooms to be the designated meditation room.

Scholarship:
- Meetings: The March 5 and 12 meetings are going to be rescheduled.
- Secretary interviews: Interviews for ASCIT Secretary will occur early next week.
- Midnight Donation: March 9! Adam is contemplating a change of location.
- ASCIT Retreat: The BoD retreat will be April 8-9.

Other Stuff:
- Leadership training: The draws have allocated funding for leadership development workshops for a small group of students. They are looking for one representative from each major group on campus to join. Christina would like a BoD member to be part of this group. Melloth is interested and will get in contact with Christina.
- Devteam: It is important to have a strong donut website that is a stable source for information. One way to accomplish this is to increase Devteam funding.
- Staff Members: BoD members are asked to find staff members within the next week so these appointments can be approved by the Review Committee at the March 9 meeting.

Submitted by Laura Conway, ASCIT Secretary
While most of us were busy gorging on junk food and watching the Super Bowl, sophomore Sam Barnett was playing in the doubles final of the 58th Annual Rose Bowl, a prestigious tournament in men's open tennis. Three of Barnett's close friends attended the tournament to provide moral support. “Before today I never thought tennis was worth watching, but it turns out I had never seen tennis worth watching,” said Flora Li of Sam’s performance. Barnett and his partner Kelly Gullett, a former All-American at Pepperdine, made it look easy as they blew past Peter Barrowclough and Cezhan Ambrose 6-2/6-0 in the semifinals round. In the next round, they went on to defeat first-seeded and heavily favored opponents Maxi-milian Licona and Luis Perez in the doubles final 6-3/6-4. Licona had won the men’s open singles tournament earlier that day, pocketing $1,000 in prize money. For Barnett, the victory was a pleasant surprise, “No matter how many times you win, the feeling never gets old.”

Winning is something Barnett has grown accustomed to over the course of his tennis career. He started playing tennis competitively at the age of ten. It was around this time that Barnett began to concentrate his efforts on tennis and started training with a coach. By 2008, Barnett had achieved his childhood goal of being one of the best tennis players in the state of Illinois, winning the Illinois State High School Doubles Championship with his partner Michael Benson. In that same year, he became a finalist at the National Men’s Open Grass Court Doubles Championship. He was highly recruited coming out of high school, obtaining offers from a number of top programs. He eventually decided to come play tennis for Caltech under the tutelage of Mandy Gamble. Barnett played number one singles and doubles last year, becoming one of the leaders of the squad as a freshman.

When asked about what drives him to continue playing tennis year after year, Barnett says, “I look forward to competing.” In fact, Barnett is lucky to be competing in tennis at all. At the age of eleven, he was diagnosed with Crohn’s disease, a rare autoimmune disease in which the body’s immune system attacks the gastrointestinal tract. He still takes medicine for the condition, which has no cure. In the future, he would like to donate some of his winnings to research dedicated to Crohn’s disease.

Barnett hopes to continue playing tennis after college. He has pondered the possibility of taking a year off after finishing his undergraduate studies to pursue his dream of playing professionally. Besides tennis, Barnett also enjoys participating in karate. On the academic front, he is an ACM major with an interest in finance. Barnett hopes to attend graduate school after he finishes his Caltech degree. If Barnett’s past is any indication of his future, he will be successful in whatever endeavor he decides to put his mind to.
Shutter Island, Not One of Scorcese’s Best
by Rick Paul

Shutter Island is Scorcese’s homage to the film noir movies of the Golden Age of Hollywood. In Shutter Island, he creates a deeply stylistic, dark crime drama based on the novel of the same name by Dennis Lehane. Although the production quality is excellent and the acting talent is top notch, most viewers will come away with the feeling that they’ve seen this movie before (or something very similar to it).

Much of the viewer’s enjoyment of the movie will depend on how early on (if at all) he determines the course the plot will take, but it is still possible to enjoy theambience and emotion of the film without paying scrutinizing attention to the shallowness of the plot.

Shutter Island is set in the 1950’s and takes place on a forbidding island about 11 miles off the coast of Boston. The island is the home of an old Civil War fort that has been transformed into an asylum for criminally insane offenders. Edward “Teddy” Daniels (Leonardo Di Caprio) and his partner Chuck Aule (Mark Ruffalo) are federal marshals assigned to investigate the disappearance of multiple murderess Rachel Solando. Upon arriving at Shutter Island, Teddy immediately butts heads with the psychiatrist in charge, Dr. Cawley (Ben Kingsley), who Teddy views as overly sympathetic to the hardened criminals that inhabit Ashecliff. Like other Scorcese protagonists, Daniels is a tortured soul who is haunted daily by the death of his wife in a fire and his experiences in World War II. Teddy feels guilt that he was not able to save people in his life (his wife and the prisoners at Dachau), and this guilt gives immediacy to his need to save the missing patient. As the movie progresses, Teddy appears less and less sane, eventually spiraling into a fit of apparent madness at the end. There is an important symbolic element to the film. Most notable are the roles of water and fire, which delineate the bounds of reality and delusion.

To reveal much more of the plot would ruin the viewing experience of Shutter Island. The movie requires multiple viewings in order to fully appreciate. Some of the logical inconsistencies in Teddy’s dreams take on a starkly different meaning once the viewer has seen the movie once. For what it’s worth, there is never really a dull moment in the movie, although some of the flashback sequences could have been made shorter without affecting the story. The primary draw of the film lies in its surreal portrayal of a basic twist that has been exploited time and time again in film and literature. The emotional weight and atmosphere of the film, along with Scorcese’s acute attention to detail make this a movie that is worth seeing in theaters.

Rating: B

Get Those Slaw Dogs!
by Dannah Almasco and Andrew Freddo

When talking with Jon in CDS about new or noteworthy restaurants in the area, he recommended that we try out The Slaw Dogs, located on North Lake Avenue. After getting a Zip Car to drive up there (though it’s the same distance as Old Pas) and parking in the tiny lot, we were a bit overwhelmed once we walked inside because it was so packed! There were many choices of pre-built “slaw dogs” with the toppings already chosen and infinite possibilities of custom combinations (just like The Counter has for hamburgers!), so it definitely took a while to decide what we wanted to eat. In the end, we settled on the Green Monster ($5.59), the TNT Super Dog ($8.88), the Chile Cheese Bowl ($3.99), and Fries ($2.49).

The Green Monster definitely is very green! It was topped with a roasted green chile, chipotle mayo, grilled onion, pepperjack cheese, and garlic salsa. We were expecting it to be extremely spicy, but the chipotle mayo lent more of a smoky flavor to the dish (which was a pleasant surprise), and the chile was sweet because it was roasted. The hot dog itself was also delicious, very meaty and definitely high quality. The only problem we had with the dog was that it was hard to pick up, so be prepared for a mess!

The TNT Super Dog (also known as “The Good Timer”) actually looks more like a burrito than a hot dog! Instead of being served on a bun, it’s served in a tortilla with chili, cheese, pastrami, fries, grilled onion, and a fried egg. It tastes like a cross between a chili dog and burrito, and, like the Green Monster, it is also very hard to eat! Since there are a lot of different flavors (and the chili dominates the dish), it is hard to discern all of them. It probably would be better without the fried egg. Overall, it’s a very indulgent and over-the-top hot dog, definitely a good treat!

The Chile Cheese Bowl had the same chili that was on the hot dogs, and was very smooth (not a chunky chili) and delicious. It was smoky, not too spicy, and was also not watered down. It was very filling and good to complement the hot dog (instead of fries). If you do want to indulge in fries, you can do that too (adding fries, drink, and fudge to your hot dog costs $3.49).

Want to try a different take on a hot dog than our normal biweekly grill night? Head over to The Slaw Dogs for delicious fare in a unique environment. Even though it just opened up a month ago, there already seems to be a large young, hip group of regulars who flock there. There is definitely a danger of a food coma after eating here, so beware! You’ll probably feel a bit lethargic afterwards, but it’s definitely worth it to enjoy these delicious hot dogs!
Prefrosh Weekend Cut Short

CONT from pg. 1
other university’s campus vis-

ics. The Friday event appears to be similar to the “Caltech in a Day” program that is already in place for prefrosh as an al-

ternative to Prefrosh Weekend: prefrosh will be able to sit in on classes, though they will also have the chance to attend panels. However, prefrosh will
check out at 5 pm, and there is nothing planned yet for the houses.

In an attempt to keep the schedule as it has been, stu-
dents outlined a proposal to cut costs in several ways. In the
past, houses had received $300 to arrange the night before their Friday night dinner. Sev-
eral presidents were willing to give this up. In addition, it was suggested that t-shirts would not be made this year. Both of these cuts were made, but the Saturday night stay was still cut out. Students had also hoped to
keep the two house dinners that have been standard in the past, but because of plans to have the In-N-Out truck serve Friday dinner, dessert will be served in the houses instead. It will be up to the houses to decide how they want to “run” dessert.

“A lot of this year is an ex-

perience,” says Black, and as Prefrosh Weekend approaches, there are several concerns about this new schedule. The IHC and prefrosh reps are worried that the new Prefrosh Weekend will not be long enough. Ac-

cording to Black, “The feeling has been that two days is a short
time, especially for people fly-
ing across country.” In addi-
tion, there are fears that there will not be enough interaction between prefrosh and students, so upperclassmen are being encouraged to go out with pref-
rosh on Saturday and maybe take them to dinner so that they can learn more about student life and Pasadena.

Caltech Harvey Mudd Math Competition

CONT from pg. 1
ica licenses, 40 Matlab licenses,
eight books from Springer, six T-shirts and gift certificates from the Math Zoom Academy, five gift certificates from Art of Problem Solving, and four games of Set! A virtual recip-
tion card game that stimulates pattern recognition.

This year’s competition was partly funded by the Moore Hufst-
deller Fund, has been in the of

ng since the fall term, and largely went as planned. The event was well received by the participants and their coaches, and was carried out to the satisf-
faction of the organizers. “It went really well,” says grading coordinator and Caltech freshman Megan Cu-
trotello. Her sentiments were also echoed by the other vol-
unteers. “It was great being able to have hand in organizing
something of the kind I’d par-
ticipated in while I was in high
school,” said Freshman Christi-
nia Lee. “It felt like I was doing something to promote the cause of math and science, which is

an amazing feeling.”

Director Kogan thought it was “an amazing experience” and expressed that this is a form being able to be a part of this event.

A high school student quoted in the MHF impact statement said “I enjoyed my time here and the experience I gained, and I hope more people will know about this soon-to-be prestigious competition.”

Food was organized by Tom Mannion, Assistant Vice Presi-
dent of Student Affairs and Campus Life at Caltech, and was prepared with the help of the volunteers. The math competition is go-
ing to be a regular annual fea-
ture in the fall, with a new field alternate-
ly at Caltech and Harvey Mudd College. The next edition of the competition, to be held in win-
ter 2011 at Harvey Mudd, is al-
ready currently being planned by the college.

Coffeehouse Employees Quit

CONT from pg. 1

Coffeehouse Employees Quit

CONT from pg. 1

that is a course I like to teach. But I also want to develop a new course around water issues based on information I gather during the sabatical. I imagine it might include topics like water delivery and treatment infrastructure, hy-
draulic engineering, hydrology, estuary and river modeling, fish dynamics, ground water, agricul-
ture, planning for the effects of climate change, and water poli-
tics. Hall leaves the following mes-

sage to student: The student experience at Caltech can be im-

proved and we can do it. But there will not be enough interaction between prefrosh and students.

“It’s a tradeoff,” said Gunalan.

“They decreased the fun worker atmosphere to create a more effec-
tive Coffeehouse that increases the happiness of the student body.”

According to Jonathan Webster, Administrative Manager of the Coffeehouse, customer counts have doubled since last year.

“The employees are generally happy about Coffeehouse being opened more reliably, having bet-
ter and more reliably stocking, and having more efficient methods,” said Puglisa. The Coffeehouse is now consistently open every night except Friday and Saturday.

“Having a placement of the su-

pervisor every open night guarantees that the Coffeehouse will be opened,” said Webster, “It’s not fair to drop the responsibility on a student.”

Student customers also show positive response to more
reasonable portion size, and the lower cost of the cold food, which according to Webster is subsi-
dized.

“We subsidize some costs be-
cause we want to sponsor this opportunity in which students can come at night to hang out and socialize,” said Webster.

Amongst the improvements, increase in salary also became a
issue, with raise from about eight dol-

ars an hour to fifteen.

Caltech Dining Services (CDS) made the decision to hire a su-
pervisor over the summer, when campus lawyers informed CDS that there may be liability issues if the Coffeehouse is completely student-run. First term, the Cof-
fefeehouse was under the administra-
tion of the administration. CDS was still in the hiring pro-
cess. When it opened second term, Sanchez was the supervisor that the Coffeehouse has a reputa-
tion for being staffed by Darbs.

Currently, three remain: Nadia  
Iqbal , David Lu, and Sylvia Puglisa, with some of the vacant spots recently filled by students from Fleming and Lloyd. How-
ever, according to Webster, only in the last two years has any mem-
ber of Coffeehouse had the Daneby worker tradition. The manager was once Anton Shuster from Ruddock, and a student from Fleming.

Furthermore, the supervising system is also not novel. Prior to the five recent years in which Coffeehouse has been student-
run, it did have a supervisor. The Coffeehouse is currently short-staffed and is hiring new workers.

“I believe overall we’re head-
ing in a positive direction,” said Webster. “We’re making it into a more enjoyable place.”

The Coffeehouse has featured special nights with guest chefs including Tom Manion, and will continue having special nights featuring cupcakes and sodas dishes.

Mole Freshman Can’t Remember What Day of the Week It Is

BLACKER HOUSE, CALTECH -- A local freshman is having difficulty remembering what day of the week it is after falling asleep working on homework sets.

“I just dozed off at my desk and when I woke up, it was dark outside,” said the confused freshman. He added, “This is crazy!”

When he fell asleep, the student had been working on Ma1b and Ch1b simultaneously, making day identification impossible on the basis of the set. Upon realizing this, the freshman insisted on not looking up the day of the week on his computer, calendar, or being told it by his friends. Instead, he cited the challenge behind figuring out the day of the week without using conventional means.

“I think it’ll be fun!” proclaimed the exuberant frosh. “I could go days without knowing what day it is!”

While the freshman is excited about that possibility, experts are unsure if he will figure out what day of the week it is before next Saturday. However, experts agree that because the freshman doesn’t have a date anyway, there’s no rush.

Basketball Team Quits After Captain’s Comment

BRAUN CENTER, CALTECH -- The Caltech Men’s Basketball Team has reportedly quit after being told by a team captain that he “knows they can win this one.”

“I was sitting on the bench, listening to him talk, when suddenly I realized that by believing what he was saying, I was ignoring all of my scientific training,” said a player after the team’s most recent defeat. “To keep trying for something against all the evidence that says you can’t do it; what does that make you?” The player then watched an imaginary object float by in the air before whispering, “Insane.”

The team recently wrapped up a disappointing 0-25 season with a home loss to Whittier, but coaches and captains are optimistic about next year.

“Next year will be different,” said a team captain. “I know it.”

APPLES AND ORANGES

YOU KNOW, IF I WAS ARRESTED FOR DOG FIGHTING, I WOULD CLAIM IN SANITY AND SAY I WAS JUST PLAYING REAL-LIFE POKEMON. THEY'RE ESSENTIALLY THE SAME.

I KNOW WHAT YOU'RE THINKING - 'DID HE FIRE SIX SHOTS OR ONLY FIVE?' In all this excitement, I - SIX. DEFINITELY SIX.
